

D/BOND

THE NEW STANDARD FOR DECENTRALISED FINANCE

/ DECENTRALISED BONDS

/ SECURITISED LP TOKEN

MARKET OPPORTUNITIES.

**OpenSea created the
ERC-721 standard &
the NFT market**

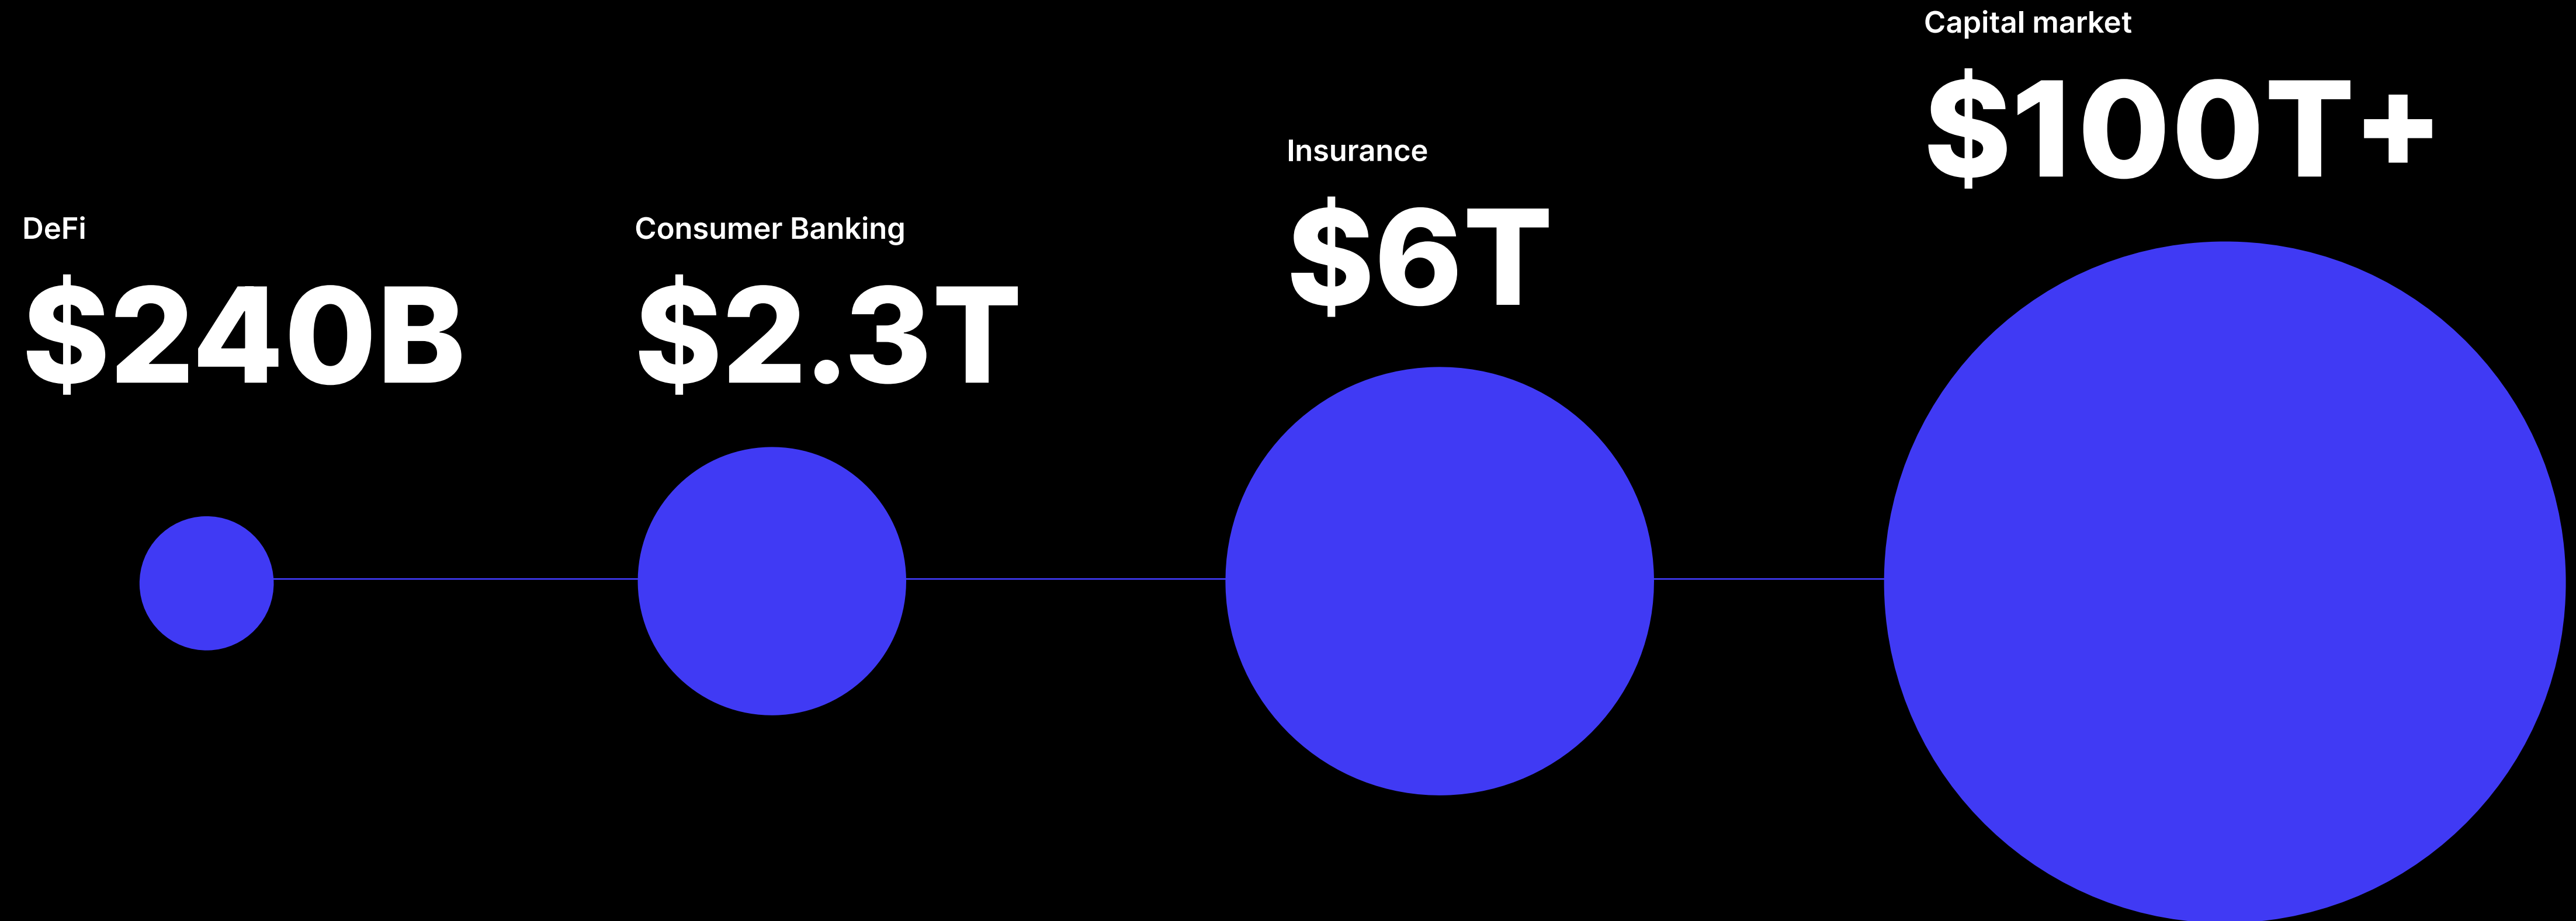

They are worth **\$13.3B**
following a new investment
of \$300m

**The Total Value
Locked on Curve Finance
is \$18.81B**

Over 2021, the total volume
of decentralised exchanges
has soared to **\$980B**

**The annualised protocol
revenue in all DeFi protocols
is estimated at \$5B**

MARKET OPPORTUNITIES.

PROBLEMS OF DEFI.

Securitised assets **do not really exist yet**

Unguaranteed payments, **risk of losing principal**

Low utilisation rate, **low** leverage

OUR SOLUTIONS.

D/Bond creates the system **to securitise any digital asset**

Fixed-rate D/Bonds with **guaranteed repayment**

Pooling multiple digital assets and trading on the secondary market

PROBLEMS OF DEFI.

Vicious cycles of
withdrawals and sells

**High transaction
fees** and slippage

**LP token is not
tradable**, zero utility

OUR SOLUTIONS.

ERC/3475 provides
certainty and stability

Multi-layered pool
**reduces slippage
and gas fee**

ERC/3475 Debonds
are **tradable on our
secondary market**

USE CASE.

Providing liquidity

Securitising assets

Instead of using an ERC-20 token pair, any type of digital assets can be used (e.g. a single ERC-20 token, NFTs, etc.)

Pair contract

Multi-layered pool

Swapping and creating pairs are more efficient, with less gas fee spent and lower slippage

ERC-20 LP Token

ERC/3475 D/Bond

Liquidity pool is more stable, therefore investment value is more certain

B2B PARTNERS.

Existing DeFi protocols

Our multi-layered pool can securitise their liquidity pools, improving their instability. D/Bonds issued by them can be traded on our secondary D/Exchange

DeFi market makers

Our decentralised secondary security market unlocks huge potential for market makers and arbiters alike

TradFi institutions

We can tokenise the securities of entities which already issue bonds

Cryptocurrency hedge funds

We create the derivative market for their hedging activity

USERS.

Token Holders

can generate stable interest yields and use only one type of token to add liquidity

Risk-Averse Users

prefer fixed-rate bonds because the full return of the principal and the interest payment are guaranteed

NFT Holders

can convert their NFT assets to securities. This gives financial utility to their collateralised NFTs

Risk Takers

prefer floating-rate bonds which allows them to enjoy most of the interest generated by the liquidity pool. Because of this, they are exposed to higher risk

HOW IT WORKS.

INPUT

ETH

BTC

USDT

DBIT

NFT

FUNCTION

Multi-layered Pool

OUTPUT

Fixed-rate
Prime D/Bonds

Floating-rate
Subprime D/Bonds

OUR BUSINESS MODEL.

**Market making
on the secondary
bond market**

**Service fee to
create
personalisable
financial
products**

**Stamp duties
when D/Bonds are
redeemed**

**50% of the income will
be sent to the
governance token pool,
50% will be owned by
the company***

* This can be revised by
a governance proposal

DISTRIBUTION OF TOKENS.

ITEM	PERCENTAGE	REMARK
Seed round	4%	Private ICO round
Private A Round	6%	
Private B Round	13%	
Public Round	2%	
Liquidity	15%	Provide liquidity for secondary market
Team	10%	Managed by smart contract and DAO
Yield Interest	50%	Minted for bond yield interest
Total	100%	Total Supply: 1,000,000 D/GOV*

*When the total supply is close to the limit, there will be an option to extend the limit through DAO

SEED ROUND FINANCING.

Maximum Supply can be revised if all the tokens are minted.
Traditional seed round consists of ICO seed round, ICO private A, ICO private B and public offering
We are also open to offer the equity of the company in seed round.

ROUND	TOKEN NUMBER	PRICE	INITIAL SHARES PROPORTIONS	FINANCING TARGET	TOKEN UNLOCKING RULE
Seed round (ICO)	40,000	Closed	4%	Closed	D/GOV tokens are unlocked during the first 9 month after listing through TVL; the locked portion will be linearly released in the next 9 months
Private A (ICO)	60,000	Closed	6%	Closed	D/GOV tokens are unlocked during the first 9 month after listing through TVL; the locked portion will be linearly released in the next 6 months
Private B (ICO)	130,000	\$35	13%	\$4,550,000	D/GOV tokens are unlocked during the first 6 month after listing through TVL; the locked portion will be linearly released in the next 6 months
Public Offering	20,000	\$100	2%	\$2,000,000	Released upon listing

LEGISLATIVE ISSUES.

1.

Legally, D/Bonds
are **digital assets**

2.

**Only digital
assets** are used
as collaterals

3.

The company **is
subject to EU laws**

4.

Global compliance

5.

D/Bonds are **taxed
as digital assets**

FINANCING & VALUATION.

The original shares of the project are 1,000,000 D/GOV, which are sold in the Seed round, Private round A & B and public offering. After the project is officially listed on the exchanges, investors can subscribe for additional D/GOV

Despite the dilution of the original shares, the quantity of the tokens remains the same while the price increases. Tokens from the seed and private rounds will be unlocked continuously as new tokens are issued

20%

**Seed & Private
A Round**

100,000 D/GOV for sale, which are expected to provide \$1,700,000 in financing for project development and marketing

40%

**Private B Round &
Public Offering**

100,000 D/GOV released for Private B round and public offering. Pre-listing valuation estimated to be \$35 million. All financing from these rounds will be used to increase liquidity

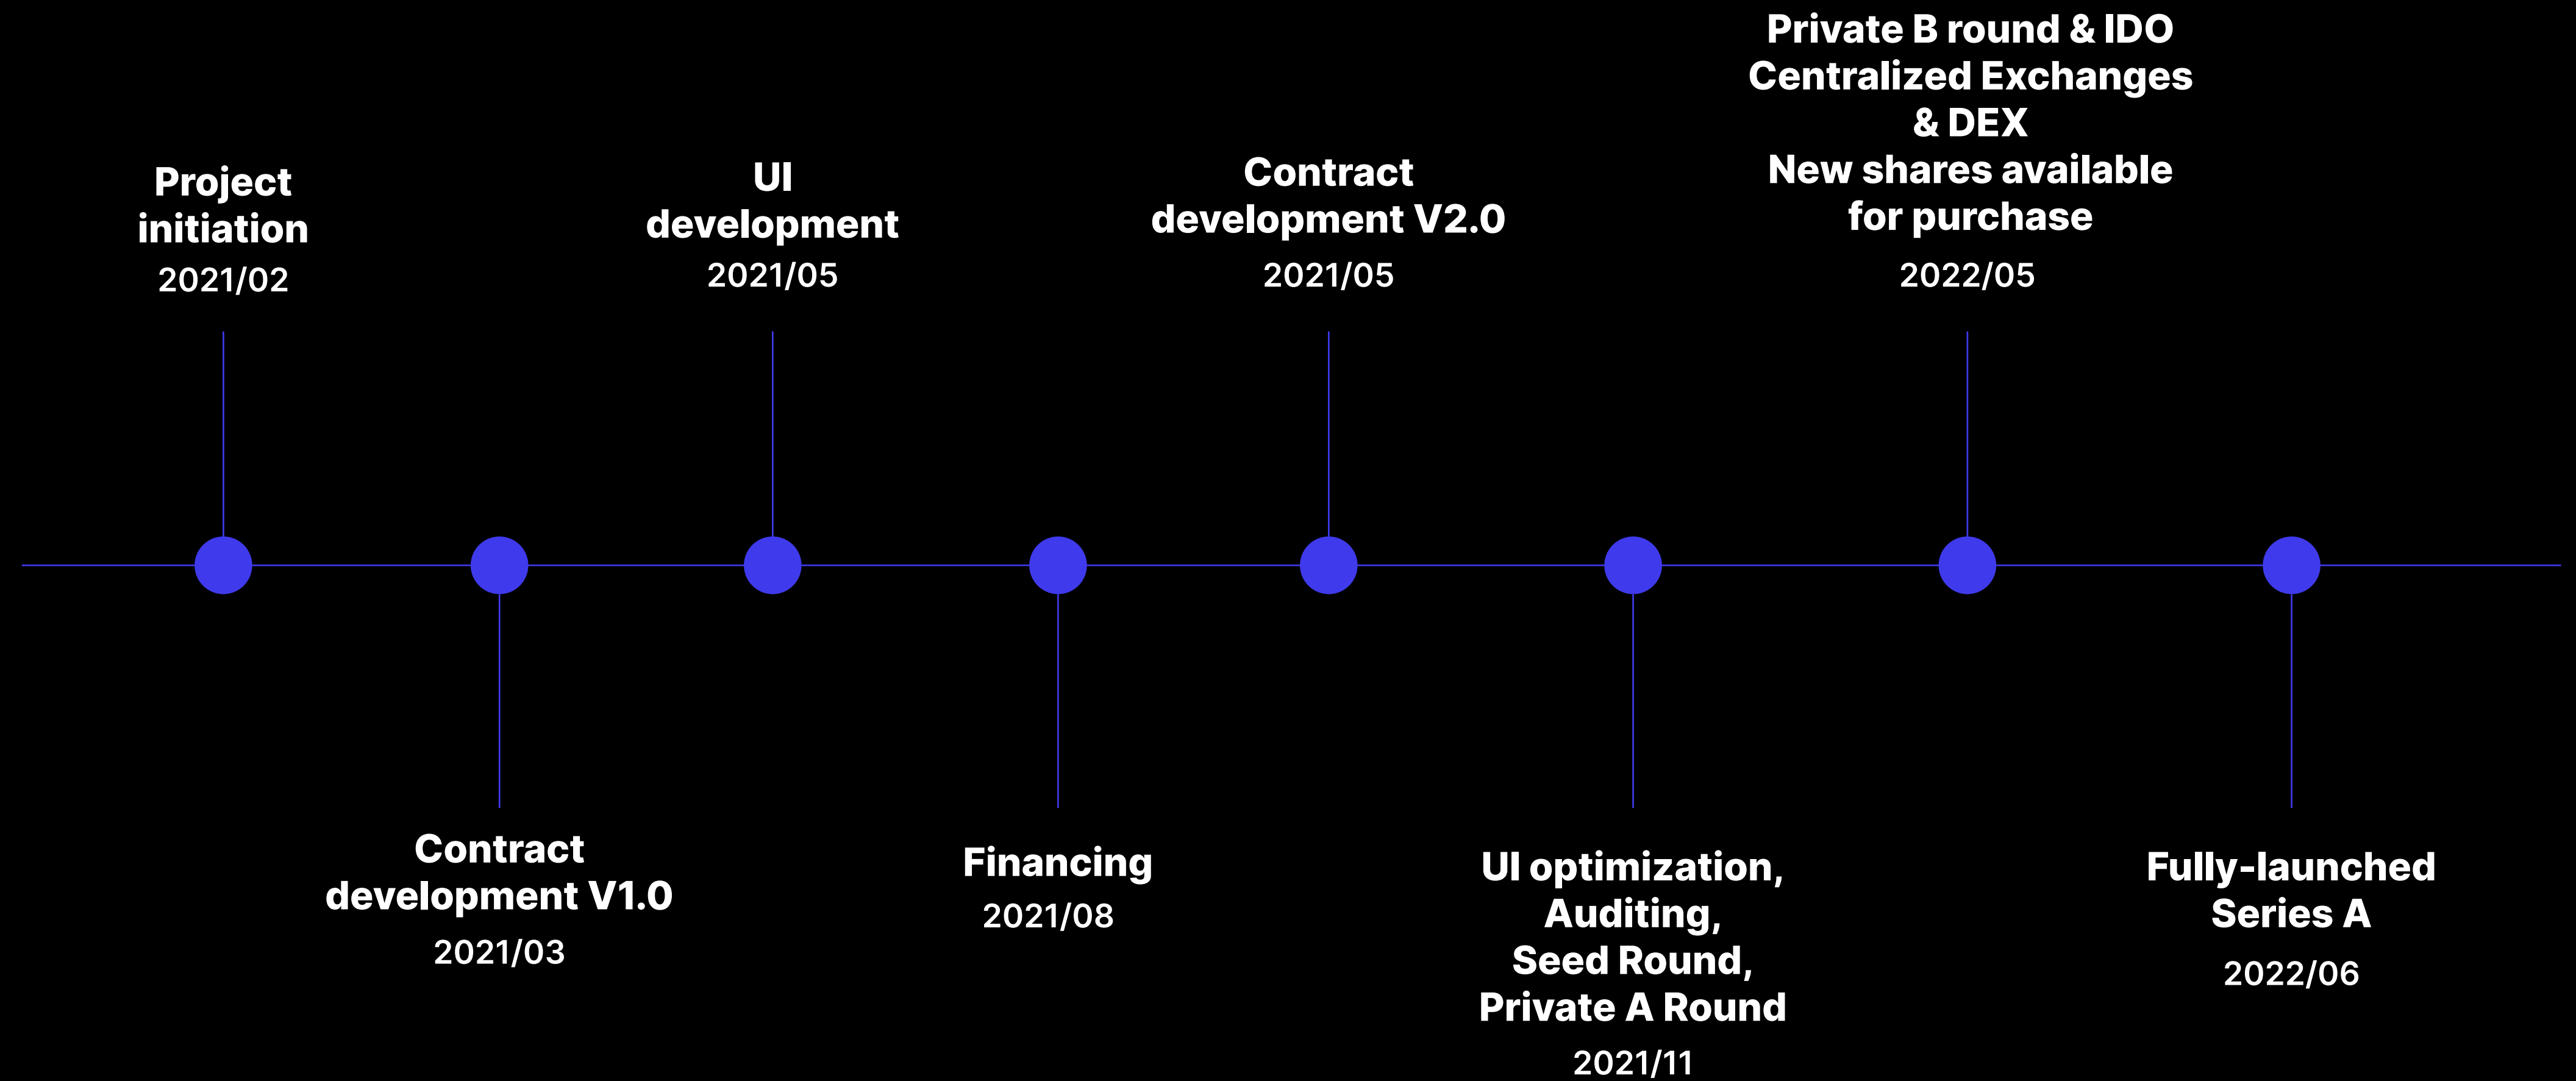

100%

**Project Launch,
series A**

Upon listing, new governance tokens are to be purchased by pledging other digital assets. The cost of minting is \$100 for each D/GOV, which will increase along with the halvening of tokens

ROADMAP & PROGRESS.

INVESTORS.

Spark Digital Capital

A research-focused crypto fund that invests in the future of blockchain and tech

Collin Star investment

In early 2015, Ryan and other co-founders of the firm believed they could set a new benchmark for asset management fund performance through investment in Blockchain technology

Exnetwork

Exnetwork Capital was founded in 2018 as a means to democratise access to opportunities to support blockchain projects

Bixin Ventures

Bixin Ventures invests in early-stage infrastructure projects that cultivate and facilitate mass adoption of open finance through permissionless and decentralized networks

Water Drip Capital

Waterdrip Capital was founded in 2017 by the most forward-thinking Chinese blockchain pioneers. It is an international investment institution focusing on blockchain industry

Wave Capital

An early-stage venture firm focused on marketplace businesses

Lotus Capital

The leading crypto fund in the Middle East, an ecosystem of entrepreneurs, engineers, researchers, and academics

Hot Dao

Investor, VC fund & incubator dedicated to the development of decentralised projects

COMMUNITY.

“**D/Bond** redefines the boundaries of decentralized finance by creating a platform that offers a huge diversity of financial products. They create links between all the current financial products that exist: **NFTs, bonds, derivatives, etc.**”

RISK-TAKER USERS

“**D/Bond** gives purpose to DeFi. I can buy bonds to support the things that I care about like climate action, animal rights, and sustainable food production.”

VALUE-DRIVEN USERS

“The existing DeFi protocols promise yields that are never assured and where you can lose your principal. There is a lack of transparency. **D/Bond** brings peace of mind and certainty with guaranteed interest payments”
