

Full Description

Location: remote

Role: Advisor

Responsibilities:

- Advisor could help our project to grow with their own resource, maybe they could introduce us some nice VCs, or nice marketing/communication agency, talented tech person with high qualified background and work experience, or maybe could introduce us some DeFi projects, NFT projects who will be interested to use our protocol and make an strategic partnership with us.
- Advisors will be shown up on our advisory board and all of our intro docs.

Advantages :

- Priority to invest our private A round (DBGT governance token sale)
- We will offer \$50k valued our DBIT Index token with advisor vesting, which will be more stable than our DBGT governance token. Advisors could cash out once their tokens will be released or they could choose to buy our governance token DBGT from our Dex by using their DBIT.

Hours :

Monday to Friday

Teleworking:

- flexible

About us:

Start-up company founded in Oct,2021, raised 2 million in seed round, building a decentralised derivative standard and market. Young and energetic team, from French and international academic background : Polytechnique, PSL, ESSEC etc.
